I cover these lies behind me  
I cover them all in vain  
I can't reverse the time  
I'll never see the light again  
The heat burns right through me  
As I fall back from you  
What once was my obsession  
Not enough to get me through

Don't hate on me  
Don't pull me under  
Don't hate on you  
Don't pull me all the way down  
Don't hate on me  
Won't hate on you

Believe in me  
These chemicals will see us through

I bleed the truth inside me  
I bleed it all in vain  
I need this fear to guide me  
I fear I need this once again

I need this fear  
I need this fear to guide

Don't wanna see your face again  
Don't wanna see your face  
Don't wanna see your face again
