[Verse]

You shot us down many times before. Now it's time for us to seek revenge. You and your team will be no more once we're through with you. In our ships you don't stand a chance.

[Chorus]

So just try to shoot us down again. Every laser beam you shoot at us. We'll just deflect it right back at you. In our new ships we're unstoppable. You will die and we will have our revenge.

[Verse 2]

Here we are now face to face. About to engage in mortal combat. The fate of the universe lies in your hands. Too bad we'll have to destroy it along with you.

[Chorus]

So just try to shoot us down again. Every laser beam you shoot at us. We'll just deflect it right back at you. In our new ships we're unstoppable. You will die and we will have our revenge.

[Bridge]

We won't go down so easily. We'll put up a fight to protect our king. There's no where to run, there's no where to hide. You'll have to get through us if you want to save your universe.

[Chorus *First time the crowd sings*]

So just try to shoot us down again. Every laser beam you shoot at us. We'll just deflect it right back at you. In our new ships we're unstoppable. You will die and we will have our revenge.
