Verse 1

See I delt with all, from the the late night phone calls
To you cheating on me, for so damn long
You know its wrong, but wanna front like its not
People say I been through alot, to lose what I got
But whats point of staying, you aint changing

Chorus:

You gots to understand just how I feel
Anything you asked you knew I will
You had no right to do what you did to me
So now since i'm leavng you wanna
Be good to me

Its the fact you live and learn
So imma let it go imma let it burn

Verse 2

You aint gots to front like we something
You took advatage of it and now its nothing
Made love all through the night
But I aint gone lie it felt so right
But that make up all the pain you brung into my life

Chorus:

You gots to understand just how I feel
Anything you asked you knew I will
You had no right to do what you did to me
So now since i'm leavng you wanna
Be good to me

Its the fact you live and learn
So imma let it go imma let it burn

Bridge:

We can move on its all said and done Took two years to
find
out I wasn't the one I finally read between the
lines I'm not the
one you need in your life And I cant cry cause

Chorus:

You gots to understand just how I feel
Anything you asked you knew I will
You had no right to do what you did to me
So now since i'm leavning you wanna
Be good to me

Its the fact you live and learn
So imma let it go imma let it burn
