Mushroom men

You may see horses try to fly
A dog with periwinkle eyes
But peppered earth with chunks of sky
Now there's a sight worth seeing

When sod gets moist with dewy flow
The fungus spores they start to show
And if you're sharp and in the dough
You may spy a different being

Mushroom men

I lean my head on a window pane
and stare right down there through the rain
And though the dims an awful strain
I think I seen a mushroom man(2x)

Mushroom men

Boletes, boletes
I'm lookin' for boletes(3x)
Don't touch the Amanitas
Look out for Amanitas

Mushroom men

Be it seven sons or seven trout
They came to see with throbbing doubt
The fungi as they pranced about
The Mu-Mu-Mushroom men

Now when mares eat oats and does eat oats
And jackalopes eat bacon
It's time to get your glasses checked
'Cause surely you're mistaken

Mushroom men
