We're acting like a pair of stranger's
Afraid of what to say
Just throw away your inhibitions
Cast your doubt away
Stop holding back from saying exactly
What it is you need
I can take away your hunger
Satisfy your greed

Ohhhhhh
Hold on tight
Let's do what we do
Here all night

Come with me
And get close to my heart
Wanna feel you nice and warm
Locked inside of my arms
Got me running like the waves
On the eye of the storm
Come with me
Come with me
And get close to my heart
Love to feel you every time we're together as one
Only you can make the way
That you move me so strong
Come with me

The walls feel like they're falling in and
There is no escape
But I feel safe and sound here with you
Sheltered from the rain

Ohhhhhh
Hold on tight
Let's do what we do
Here all night

Come with me
And get close to my heart
Wanna feel you nice and warm
Locked inside of my arms

Got me running like the waves
On the eye of the storm
Come with me
Come with me
And get close to my heart
Love to feel you every time we're together as one
Only you can make the way
That you move me so strong
Come with me

Deep inside me
I feel that we're both connecting now

Heyyeahyeahyeahyeah (3x)

Come with me
Wanna feel you nice and warm
Locked inside my arms
Come with me
