We are the demons from the bottomless pit  
Here to plague with terror  
We are war, death and destruction  
For ours is the rage  
That will inspire an uprising  
We are the scourge of the idiot's reign  
A nation of the ignorant and weak  
A void of stupidity and endless waste  
A world engulfed in absolute insignificance  
Ours is the path that will lead to absolution  
We are the catalyst to the new world's arising  
All shall perish by the rains of led  
And total holocaust  
We shall purge with genocide, heretical slaughter  
To rid this world of mortal parasites  
We shall never cease 'til life no longer dwells  
Until this world spins desolate  
We are the scourge of the idiot's reign  
A nation of the ignorant and weak  
A void of stupidity and endless waste  
A world engulfed in absolute insignificance  
Ours is the path that will lead to absolution  
We are the catalyst to the new world's arising  
We shall never cease until this world  
Spins desolate and barren
