ChorusComing down new sound

should be thankful

Dirty riffs Dirty beats Dirty samples

sell out show take the money

then we cancel

frontrows-backrows getting trampledChorus

What, before we just left the scene alone

Got some front page headline and rap&mic; zone

Are you mad? I forget what trouble understanding

What it takes to fly the globe but keep the crowds  
damending

More of the time of the beats you felt

kind the smooth as you associate the cream that melt

all over tracks the states and patents are created

like a emblem on the girl that says it's highly rated

You figuredout how much energy when we lash it out

how much goes into a state when we move and bash it  
out

I'm no out Its not coincidence why I'm hear

Its not the lucky team who had the lucky run of cup year

Chorus

You can't buy a snatched car that jumping this hard

And bust the kind moves that cut the bone and leave  
you scared

It's stolen behind the picture, taken behind the faces

take a look around see who leads and who chases

advancing I don't care how you feel just keep dancing

You heard me I jumped on extra tide and I flaw  
superbly

Cuz it's coming open up the gates keep it running

Never been the once to caught your star sluming

That's an easy way rather sail the storm then a gentle  
tide

I find it's more exciting and besides I think it's justified

That we should blow, sky dive in the logo and let the  
people know

40 000 feat is to climb and check out the way she go

we'r gonna wait until we got it to you realize it's a  
master piece

treated like a prisoner whoz got no chance of a quick  
relase

or realize his precious and discover the truth

and let signals be the marker point to reach for the roof

Chorus:

I don't where to stop when I see low |

I can't hold back attack, respond with draw(war) | 3x

I don't where to stop when I see low

Can you see that you see the door

What you think you could just step it of the street

If you don't get the bringing you don't get the link

That's why some people talk when they really need to think

Clearly like neeb ears don't come yearly

Our camp is truely one of a kind we ment sincerely

For real we know that you shold know by now

You see it's started already you should tell by now

Exact the satisfied frends around the track

We've already started planning way to set the kind of rap

It's been ready for years but see it's all about timeing

You can't expect to reach the top with out a little climbing

It make sense you can't hold back with gay fence

You look tense I move on with carefull accent

And stand tall don't wanna reach one but reach all

Gotta feeling that you heard already cuz we heard call

Chorus x2 (corect me if i'm wrong
