Well there's a place down the road  
Where the whiskey goes down hard  
And I've been thinking that I gotta go  
Spend some time in a bar  
Cause her memory  
Well her memory's left me scarred

And it's been forty-eight hours  
And I aint had no sleep  
But the little white pills there just enough to keep me  
awake  
Well I don't know how many more I can take

Chorus:  
Cause it's been six days since I've been sober  
It's been six days since I've been high  
When she told me this was over  
And left a lipstick kiss goodbye  
So I'm moving on a little further down the line

I got a cd in my radio and I got it up loud  
I got two hundred horses laying rubber on the ground  
Right behind me  
Where she's never gonna find me

Oh and I aint got no money  
I aint got no smokes  
I got a beat up guitar and a love song that I wrote  
Back before my heart was broke

Chorus

Well it's a long long way to Nashville, Tennessee  
I guess that's what she always expected of me and my  
songs  
But that would take too long

Chorus
