TV is making me crazy
Late night shows it's three am
My dreams are pushing up daisies
I'm wearing out memories to keep from giving in

But these days I feel a little bit lonely
These nights I feel a little bit scared
And sometimes I wish that you'd want me
Now and then I pray that you'd care

Chorus:
I'm gonna love you
Just as long as I can
And don't try to stop me
Baby it's the way that I am

Well I been waiting up all night
For the telephone to ring
I've been knowing it'll be alright
I've been praying that your all I need

But your so high above me
Where fate is thin in the air
That if you ever come back down
You wont believe that I'm still here

Chorus

You been walking around
Like a fool in the dark
And when you can't reach your stepping stone
You just use my broken heart

But what am I left to do
On this hot midsummer night
With this state of sin that you left me in
And the feeling that this aint right

Chorus x2
