"Over The Night"

Visit "[Over The Night](#)" on MotoLyrics.com

The fears and troubles in your mind
By me you get away
I will keep your love and all your dreams come true

Over the night the feeling's right believe me
That's the future of love.
Over the night inside your eyes
You see the flame of my growing love.
It's not far away

When your heart is coming down
And you can break away
Follow me, don't make me frown.
I'll give you better days
The fears and troubles in your mind
By me you get away
I will keep your love and all your dreams come true

All that I know in my life
I've learned on the street
And the colors of the night
I have taken all my fears
So wake-up from your nightmare boy
Cause you can lose your mind
I will keep your love and all your dreams come true
