"Survival Sickness"

Visit "[Survival Sickness](#)" on MotoLyrics.com

Manifest this repression with smart bombs and easy
listening
Rally me up in this non-decision making, I got my mind
in for the taking
My heart still hurts from last night
I've got survival sickness
Entertain me, the plot thickens, serve me up some
(promises) of your good living
A grand total of understatement, show me salvation
and I'll tell you why I hate it
My heart still hurts from last night
I've got survival sickness
You know how it feels not to be wanted down here
You know how it feels not to feel at home anywhere
You know how it feels to live down on your knees
You know how it feels to always say please
My heart still hurts from last night
I've got survival sickness
