

## The American Dream

### "Euthanacia"

Visit "[Euthanacia](#)" on [MotoLyrics.com](http://MotoLyrics.com)

You're all locked up in darkness  
You're still scratching the surface  
And you're stitching the red dress to the black  
You are wandering nervous and searching for purpose  
But with death on your mind you seem right on track

Now you know that I love you  
You use that against me  
You try to offend me until I charge  
The mass reaction inside the last refractions grasp  
In what you thought was real is only real because

You went and made it up  
You're chained up  
You locked us up  
And you broke the silence with one word  
A bad word  
A sad word  
And you can't stop going you know two  
You want to  
It takes two  
But there ain't no coming back  
You know  
We both know  
As we slowly slip between the cracks

Now you feel this injustice  
You feel it within you  
You let it control you and I know why  
Because you can't see the colors  
Can't see the love here  
You can't see the something that you can't find

Now you know that I love you  
You use that against me  
You try to offend me until I charge  
The mass reaction inside the last refractions grasp  
In what you thought was real is only real because

You went and made it up  
You chained us up

You locked us up  
And you broke the silence with one word  
A bad word  
A sad word  
And you can't stop going you know two  
You want to  
It takes two  
But there ain't no coming back  
You know  
We both know  
As we slowly slip between the cracks

Suicide mirror  
It's time to wake up  
And see now  
Open your eyes  
For me it's time to wake up  
And see

Your eyes are still closed and the lights are all still dim  
And I still see this inside my mind  
You're still far the hole and digging my feet in  
Why would you take me so far inside

â€™™ Cuz you know that I love you  
You use that against me  
You try to offend me until I charge  
The mass reaction inside the last refractions grasp  
In what you thought was real is only real because  
You went and made it up  
You're chained up  
You locked us up  
And you broke the silence with one word  
A bad word  
A sad word  
And you can't stop going you know two  
You want to  
It takes two  
But there ain't no coming back  
You know  
We both know  
As we slowly slip between the cracks

Suicide mirror  
It's time to wake up  
And see now  
Open your eyes  
For me it's time to wake up  
And see  
Now open your eyes

Please see, you know want this  
Inside this dream  
You know you got it  
Please see  
You have to stop this  
Suicide is not a dream  
And this is not worth being your friend

I feel your grinding  
It's alike  
But it's not  
If it only wasn't  
I'd refrain from my speech

You went and made it up  
You're chained up  
You locked us up  
And you broke the silence with one word  
A bad word  
A sad word  
And you can't stop going you know two  
You want to  
It takes two  
But there ain't no coming back  
You know  
We both know  
As we slowly slip between the cracks

Suicide mirror  
It's time to wake up  
And see now  
Open your eyes  
For me it's time to wake up  
And see

Please see you know want this  
Inside this dream  
You know you got it  
Please see  
You have to stop this  
Suicide is not a dream

Suicide is not a dream  
Suicide is not a dream  
Suicide is not a dream
