(Sonny Curtis)

Remember the day we first got together  
You were the rage in jeans and leather  
I talked you into wearing your hair long  
You never would do one thing without me  
And you told the world you were mad about me  
And you made my life a song.

Remember all the times we used to go walkin'  
But what about the nights we spent just talkin'  
I really could count on you when everything went wrong  
Whenever I thought I just couldn't take it  
You were right there to help me make it  
And you made my life a song.

But now those days with you are suddenly gone  
But there are so many good things to think about from  
now on  
Like the crazy songs we composed the movies at  
Lowe's  
Our high fashion clothes  
The fun and the roses and you and through it all you  
make my life a song.

Been so long since we were together  
But you'll be in my thoughts forever  
I'll always have your mem'ry to call my own  
And if your new romance starts to fadin'  
Just come back runnin' and I'll be waitin'  
Cause you made my life a song.

You made my life a song  
You made a life a sweet and beautiful song...
