Wait for me, I don't know where I am
Without you I am lost
Stay in me, without you I am scared
And your hand comforts my heart
How I fear for the worst
When I can't feel your touch
I need you by my side
And your footsteps and guiding me wherever I go
In springs fresh grass, fall leaves and in the winter
snow
Yes your footsteps are guiding me wherever I go

Chorus:

And yes I choose to follow you
I won't fall back or slow down
Cause I feel your arms around me
And your footprints they surround me
And yes I choose to follow you
I won't fall back or slow down
Cause I feel your arms around me
And your footprints they surround me
Yeah

When I run and you're out of my sight
I busy my mind, convince myself I am fine
When I fall (when I fall) and realize I'm alone
You take me back as your own
Who am I to deserve to be held in your arms
Even after I betrayed
Your footsteps are guiding me wherever I go
In springs fresh grass, fall leaves and in the winter
snow
Yes your footprints and guiding me wherever I go
Yeah

Chorus 2x

I choose to follow you
