Please believe me
I'm estatic for you
Well why should i pretend
I have nothing to lose

No I don't compare
You've got it all wrong now
My sorrows left behind
Let me tell you the truth
Chorus
I feel nothing but
Joy and pride and happiness
Nothing but
Cheerfull face with kindness
I feel nothing but
Oceans of love and forgiveness
For you and your sweet girl
Please ignore the
Particular way i smile
Take no notice of
The blood on the lip i bite
I am still your friend
There is no denying
For you and your new girl
Yes I remember
Everybody has affairs
Oh yeah we had some fun
But she is so perfect for you
