good and evil does not exist(? CHRIST?)  
fix the outcome overall playing into follow along  
face the weak bland righteousness  
deliver them or kill them dead  
shorter now god  
and the demise patience cries the burning cross

confessions alter bugged faith  
moisten gland insert and taste

shorter now a god lies rich  
forced upon a sinners itch  
kept a box locked in tight  
slaves reward reserved in spite  
drive across and burn incense

this is the god to save your soul  
water burns holy  
kill the faith inside of you  
watch the killing starts  
after you accept the part  
to redirect your mind  
whisper the name  
all is not so black and white
