whatever painted part taught deeply enclosed in
mother earth life born
addict breathe angel whatever paint it up so closer to
farther apart
meat seeking missiles consuming rain forest infested
veins the
river flow urban needle inject carcinogen chemicals
relieve the stress slows
consumer rotting sight no taste odorless clear seeping
water poisoning
all producing nothing intelligent to cause disease
human breed in self
perpetuating whatever close at hand finger cramp
virtuoso closet problem
epileptic machines shudder shock who is over who is
on top malformed
earth born shake all is a disease biped walk so straight
earth can be so
giving as it can be irrate what if to burn up and out with
illling over
doubt sight no taste odorless fda recommends to take
daily allowance
of them 26 unknown carcinogens 26 unknown cancer
causing supplements
infested chemicals fda virtuoso closet problem
whatever to plot or build
to self destruct the so called lesser beast exhibits
harmony walk straight
biped relate walking disease green is the grass of
survival
feeding the cows that they dine on all is a disease
human disease survival
