[Dreams not waking creeping down inside the quiet
urns
warm in the arm hate burns illusion pain pain pain]
listen to the sound crashing down into it the needle is
walk out in the street see the vacant eyes dreaming of
wonder what I'm going throughpain.....
the dream unbroken economic repression plays a part I
wasted away island body on a darkened see to avoid
never dies crawls up the back and waits for the lies tall
flicker lights the candle burnsinside..... a pain that
chattering taped tape taping human muttering warning
climb edges edges exhausts no night climbing higher
..... crawls wicked wire cut throat explodes
fate..... human heart explodes attacking pointed sticks
singing of the the vein no desiregreat
in sores the arms wheres the warning warning shot the
lights
travels to the heart human heart flags the blood
out wheres the warning needle is warm in the arm
a halo of fire scarring made of flame the flower
chair that horror tray of fear wheres the warning
warning killing
supporting the game of lifethe pain..... broken
flavor find its worth calls the tripping strings
meaching human heart except my patience is
giving
up on me..... river of track mark volcano upon the arm
open sores allowing ants to crawl in and I
wonder if I missed the warning missed the warning
casting
away varnish crack ants symbolize decay missed the
warning missed the vein reaching out crying for
where is the warningheart exploding human heart
attack.
