Turn up the sound make it feel louder

Open the dark side of me  
Find what your faith needs to be  
Help me gain focus on you  
Heart bleeds I know what to do

Turn up the sound now  
Make it feel louder  
Who is this playing  
Are you still here  
Who's all around now  
Are you still listening  
What are they saying  
Words that aren't clear  
Turn up the sound now  
Lost in the crowd and  
I haven't heard this one before  
Turn up the sound now  
What are you saying  
No I'm not listening anymore

Please don't confess to the sin  
Unless you are set to begin  
Fallout seems more than just trust  
Walls down dive into us
