It's a never over 'til you've killed the manic expression  
one for all

Stand too tall

Terror skinned him to the bone

He saw the liberia and liked to say I'd make it on my  
own

My way home

You keep me sane

You keep me sane

Save enough or suffer you

Strong enough to see it through

I wonder you

Scratch the eyes enough to see

All the misery has been around as I pretend to be

Starve free
