

The Decatures

"Call My Name"

Visit ["Call My Name"](#) on MotoLyrics.com

I was feeling sort of lonesome
I thought that I was gonna die
But that was long before you
Had to go and catch my eye

I haven't seen you as of late
And I know that it's a shame
'Cause baby all I could ever want
Is to hear you call my name

I don't know if I love you babe
But I need you oh so bad
You really made a man of me
The best woman I ever had

But second thoughts are running rampant
All through my tattered brain
'Cause baby all I could ever want
Is to hear you call my name

I've been thinking of leaving you
Been thinking about the fish in the sea
There's so many roads I could travel
So many other places to be

Kingdom come and kingdom go
Well it's been that way so long
A rolling stone don't gather no moss
So I best keep rolling on

It's not my fault that hesitation
Is driving me insane
'Cause baby all I could ever want
Is to hear you call my name

I've been thinking of leaving you
Been thinking about the fish in the sea
So many roads I could travel
So many other places to be
