"A Little Longer"

Visit "[A Little Longer](#)" on MotoLyrics.com

I've been I've been waiting hesitating and I can't make
a choice right now
Been, meditating on my options and I can't seem to
figure it out
The future is an endless possibility
The future what does it hold for me

Please don't try and push me, let me rest here for a
while
The unknown is frightening, I wanna think a little longer

As some of the costumes are forgotten this humid
feeling grows
We share our exhaustion from the days work and it is
our home
The future is an endless possibility
The future what does it hold for me

Please don't try and push me, let me rest here for a
while
The unknown is frightening, I wanna think a little longer
