

## The Fairchilds

### "Our Revolution"

Visit "[Our Revolution](#)" on MotoLyrics.com

Everybody's changing, I need a rescue  
Everybody's lying to feel alive  
We're all in pain and freedom's getting harder to find

Running round in circles waiting for an answer  
Ready to explore in a twisted night  
Our dreams are big but yet we give up without a fight

Our revolution, our evolution

Looking for surrender, looking for some action  
Lazy we are dreaming the way I like  
You wish you'd kissed that girl you watched from TV at night  
So get up off your knees before you hit the ground

Our revolution, Our evolution  
Our revolution, Our evolution

Since you're looking  
There's nothing besides our desires  
Even behind our fear the kindness scars  
You've got to see since I've got mine  
Don't you want the holly one to treat you right

Everybody's changing, I need a rescue  
Everybody's trying to feel alive  
We're all in pain and freedom's getting harder to find  
Sometimes you have to lose yourself you've better give it a try

Our revolution, Our evolution  
Our revolution, Our evolution  
Our revolution, Our evolution

(Instrumental)

Our revolution, Our evolution  
Our revolution, Our evolution
