You told me all about her  
Underneath the shooting stars  
How you love her but you leave her  
And you can't go very far  
Away until you're back again  
Starting it all over  
And we watched the stars fall from the sky  
But we never ran for cover

Chorus:

And I said there goes one  
Lighting up the sky  
There goes one  
Gone so very fast - watch how they fly  
There goes one  
Lighting up the night  
There goes another shooting star  
Too late - it's passed you by

The northern summer's cool night air  
Made us feel like dancin'  
Or maybe it was talk of love  
Or stories of romancin'  
But when you stopped and looked at me  
And you asked me what I thought  
I looked above and I searched the stars  
And the answer that I got was

Chorus: (twice)

There goes another shooting star  
Too late - it's passed you by  
Too late  
Too late
