You got me open minded, I'm not surprised that  
My third eye's floating we're on to something and it's  
perfect timing  
I'm all aligned, I want to do this, I want to do this

Some about you are you making me, are you making  
me groove  
Are you making me,.. just want I want and I wanna do  
you yeah [x2]

I could tell there was something when you walked by  
Fly like your feet touch down on the clear sky  
Took time and you gave me moments  
Exhaled then I regained focus, yeah  
I think you're special baby, I think you've got me  
I know you want me, you really want me

Some about you are you making me, are you making  
me groove

Are you making me,.. just want I want and I wanna do  
you yeah [x2]

When you're me since you came through seems, like  
I'm living in a dream  
Better than I ever ever felt before, so damn sure  
Cause my heart's been cure of the pain that I once  
sustained  
All in the past, moving fast, at the top of the class and  
I'm learning  
Pages turning, flowing through the stages, auras  
blazing, you're amazing

Some about you are you making me, are you making  
me groove  
Are you making me,.. just want I want and I wanna do  
you yeah [x4]  
Something about you.
