"Numb"

Visit "[Numb](#)" on MotoLyrics.com

I see my fear Everytime I open up my eyes
When you come around I will tried to hypnotize
I talk in fear coz you caught me by suprise
I need to scream or I need to realize

Pre-chorus:

I've been so full of you
Need not to take it
Give me something else that I can do
How can I disappear
When I can't even see those thing I tried to hear

Chorus:

I'm sick and tired of all these games
This game you tried to feed me
But it feels the same
I'm sick and tired of all these games
This game you tried to feed me
But it feels the same

Now that you're gone maybe I can be like someone else
I talk to proud just to let it on my chest
I can't believe I wasn't stuck inside
Been there for so long didn't notice past this time

Pre-chorus:

I've been so full of you
Need not to take it
Give me something else that I can do
How can I disappear
When I can't even see those thing I tried to hear

Chorus:

I'm sick and tired of all these games
This game you tried to feed me
But it feels the same
I'm sick and tired of all these games
This game you tried to feed me

But it feels the same

Bridge:

You'll say you be alright
But you wont give up without a fight
Thing have been so unreal
Give me something else that I can kill
Just one more thing before go
When you leave Just close the door

Pre-chorus:

I've been so full of you
Need not to take it
Give me something else that I can do
How can I disappear
When I can't even see those thing I tried to hear

Chorus:

I'm sick and tired of all these games
This game you tried to feed me
But it feels the same
I'm sick and tired of all these games
This game you tried to feed me
But it feels the same
