

The Hollow Earth Theory

"North Star"

Visit "[North Star](#)" on MotoLyrics.com

Stolen for countless days
By stars that I call my friends
Fallen into my arms
This place where time stands still

Value it peels away
Equal dreams and equal pain
Living amongst the dead
It's the same shit different day

Is life lonely
Without me?

Did I explain that I'm not feeling quite myself
How did I get here and will I find my way back?
I didn't take my time and wait for the effect
Too much too fast now do I regret?

Part of me died that day
I'm glad it got in the way
Eyes hold an intense moment
That I spent with you

Hold me by my skin
And heal me from within
Make me make a promise
That I can't refuse

The light shows me
It's on me...

Did I explain that I'm not feeling quite myself
How did I get here and will I find my way back?
I didn't take my time and wait for the effect
Too much too fast now do I regret?

You know more than you think you know
My north star where did you go?
You know more than you think you know
My north star where did you go?
Where did you go?

My north star where did you go?
My north star where did you go?

Now I go really far away
I'm getting scared I might not leave
Stand me up but watch my eyes
Rolling back into the blind

Talk to me now
Let me hear your voice
Repeat the day how you know
We shared it all

Look at me
Hear your voice
Stay away
You've no choice

Did I explain that I'm not feeling quite myself
How did I get here and will I find my way back?
I didn't take my time and wait for the effect
Too much too fast now do I regret?
