(Come On)

One - The fact that you regret what you've done

It's a starting point

Two - You've got to learn to burn without a fuel

There's no easy way

No easy way out

Do you remember those games we played

And how it all felt so good to me?

You lie flat on your back

Trying to breathe so steady

But you clutch at your chest

Counting each beat

Now that I finally see what's real

I've got a chance to change my life

This is the song that I will sing

To clear the cloudy skies

Day never meant much to me

I was a creature of the night

But now I've killed the worm inside

I think things will be alright

Three - Your better put a leash on that dog of greed

He's gonna run away and there'll be hell to pay

Four - The kind of pain that leaves you wanting more

Is standing at your door, what are you waiting for?

I can't believe what it's done to me

It took it all it pulled out a part of me

Shooting pains down my left arm and a knife in my
back

I need help up off my knees

Now that I finally see what's real

What I can touch and feel

This is the song that I will sing

No matter what the future brings

Day never meant much to me
I was a creature of the night
But now I've killed the worm inside
I know things will be alright

Remember the time...

We didn't sleep for days
And just stayed up all night
Watching the comets streak across the sky

Remember the time...

That we laughed so much we cried
I don't want to die

Now that I finally see what's real
I have a chance to change my life
This is the song that I will sing
To clear the cloudy skies

Day never meant much to me
I was a creature of the night
But now I've killed the worm inside
I know things will be alright
