

The Hollywood Kills

"Don't Panic"

Visit "[Don't Panic](#)" on MotoLyrics.com

When everything looks precarious, don't panic
When all you see is the downside, don't panic
We can ride this wave into the shore

When drifting on without a destination, panicÂ...
I mean don't panic
If you allow them, your worries will soon dissolve,
Don't panic
Let's exhaust our options before we ride

Try not to lost your head
When you're in the thick of it
Because you just might find the answer lies
In the middle of a maze
Try not to change your direction
When you're full speed ahead
Because you just might roll it over
And have to start over again

If you can't restore your normality, don't panic
If the wheel comes loose and all you know to do is
panic,
Well then don't panic
Because when you reach the crest
The ride down is a breeze

Try not to lost your head
When you're in the thick of it
Because you just might find the answer lies
In the middle of a maze
Try not to change your direction
When you're full speed ahead
Because you just might roll it over
And have to start over again
