One thousand miles per hour  
like the streak of light  
lightening smashes silence  
blinding in the night  
fireballs from Hades  
colliding with the earth  
witness frantic comets  
the age of Hells rebirth  
Smashing the sound barrier  
break open suns at will  
gaining on you faster  
leaves jet planes standing still  
scorch the moon to cinders  
melt metal into lakes  
Disintegrater likes it  
Disintegrater takes Hiroshima was no match  
dwarfed by this desolation  
the haulocaust was nothing  
by Disintegraters salvation  
the Earth is smashed to pieces  
universal rise and fall  
the stars are now a waste land  
Disintegraters called
