We are Lost

We are lost
And the night is getting colder
We're getting older...

We are Lost
And we got no place to go

We are lost
On a dead end street
Tired and weak...

We are lost
And we have nothing to show

There's a light above the Mission hall
There are dreams written on the wall
A highway for a second chance
Music and a floor to dance

I walk through this tower of mirrors and glass
I move with the shadows and take pleasure at last
So my secret life
Remain for ever in the past

We are lost
Fearing the future
With nothing to hold

We are lost
Quicksand
Surround our souls

We are Lost

We are lost
And the night is getting colder
We're getting older...

We are Lost

And we got no place to go

We are lost
On a dead end street
Tired and weak...

We are lost
And we have nothing to show

There's a light above the Mission hall
There are dreams written on the wall
A highway for a second chance
Music and a floor to dance

I walk through this tower of mirrors and glass
I move with the shadows and take pleasure at last
So my secret life
Remain for ever in the past

We are lost
Fearing the future
With nothing to hold

We are lost
Quicksand
Surround our souls
