Originally performed by Minor Threat

What happened to you
You're not the same
Something inside your head made a violent change

It's call it religion
You're full of shit

Was she really worth it?
She cost you your life
She'll never leave your side
She's gonna be your wife

It's in yor head
Filler

You call it romance
You're full of shit

Your brain is clay
What's going on?
You picked up a bible
And now your gone

It's in your head
It's in your head
It's in your head

You call it religion
You're full of lshit

You never knew
You never did
You never will

You call it religion
You're full of shit
