Say no way, we won't let them grow up that way  
Things have changed but some things have stayed the  
same  
Hold on to what you want to but some things are  
passed down anyway  
Hold on to what I want to, I don't think I know what I just

Leave me without a God, without belief, without a  
cause  
Without a path that I should take, without a choice that I  
should make  
Such an easy thought and now I had it but I lost it  
I guess I need your help and now I guess I need your  
help and now I

Say no way, don't let things go on this way  
A clean slate but it don't work that way  
Hold on to what you want to but some things are  
passed down anyway  
Hold on to what I want to I will have to own what I have

Leave me without a God, without belief, without a  
cause  
Without a path that I should take, without a choice that I  
should make  
Such an easy thought and now I had it but I lost it  
I guess I need your help and now I guess I need your  
help and now I

It's not my stuff, it's just too much  
It's just my stuff, it's just myself  
It's just my

Leave me without a God, without belief, without a  
cause  
Without a path that I should take, without a choice that I  
should make  
Such an easy thought and now I had it but I lost it  
I guess I need your help and now I guess I need your  
help and now I
