You just can't see that the future has a legacy
so raise both your hands, pray for justice
'cause were gonna act

Where to go? Let me know
I stand here, set me free

We got no rights in this life
let's all unite, make things right

We will not fall, fight for justice and just take it all
and you'll stand beside and be quiet
'cause you are a lie

Where to go? Now I know
stand my ground, take what's mine

We got no rights in this life
let's all unite, make things right
I beg for differ and truth
'cause we got no rights in this life

We got no rights in this life
let's all unite, make things right
I beg for differ and truth
'cause we got no rights in this life
