A thousand voices in my head
Keep me silent in this bead
You're lying near me
But do you feel me?
We're together, I'm alone
When did lies become our song?
We messed up badly
Can we save this?

You know I can't be less than everything for you my
love, oh no

Do your worst,
Go on
Come let it out on me
Crazy calm and out of reach
Starring back at me
Get it over with
Our love was meant to last forever
Forever

Off by dawn not back 'til late
We drift apart we drift away
Did we stop caring?
Why are we changing?
That's the way of the world
It was us against the world now we barely say a word
We messed up badly
Can save this?
That's the way love goes

You know you're never less than
Everything for me you're all I know

Do your worst,
Go on
Come let it out on me
Crazy calm and out of reach
While you're starring back at me
Do your worst
It don't hurt

I can take much more than this
Get it over with
Our love was meant to last forever

Stop the world from turning I'm out of breath
Take us back to the first time we met
Don't waste our last dance
Take me by the hand and let's run away
Don't let another morning just fade away

Do your worst,
Go on
Come let it out on me
Crazy calm and out of reach
While you're starring back at me
Do your worst
It don't hurt
I can take much more than this
Get it over with
Our love was meant to last forever
I can take much more than this
Get it over with
You promised
Our love was meant to last forever
Meant to last forever
Our love was meant to last forever
