In the future there aren't any more cars
in the future the air is so clean
in the future in the future
there aren't any more cars
but I've gotta big one
it's a 1965 Plymouth Fury Four Door
it used to be a squad car
it was made by some extinct car company
I have a hard time findin' parts
but I've gotta Fury Four Door
and I've gotta little gas
take it for a ride
all my friends can come along
take it for a ride
take it for a ride
lots of room inside
take it for a ride
I'm gonna spray paint that bad boy black
in the future there aren't any more cars
in the future the are is so clean
in the future in the future
all my friends can come along
take it for a ride take it for a ride
