I overdose as mind takes control  
Who would have known the demon hides in my soul  
They say to listen to everything  
My heart, my soul, this was a dream reality  
Pick up your fucking feet and dance with me  
One day you will see me  
One day you will see  
See me praying for the ring  
Praying for the day  
That you will marry me

I want you for me  
(I want you for me, I want you can't you see)  
Your beauty is all I need  
(You're beauty is all I need)  
With out you, I can't breathe  
It's like a noose around my neck  
It's choking me

Breakdown tonight, I will never die  
One day you'll see  
That we were meant to be  
I cannot take this oath

Girl surrender all your love to me,  
Girl throw your hands in the air and make love to me  
Surrender all your love to me, whoa

Don't let go, we can change it all  
Never leave my side, until the day I die,

Die tonight  
If this could be something  
Then I would be happy  
I would be happy

Just to know your name would please me
