(Anderson / Howe / Wakeman / Bruford / Vangelis)

Let us be together, let's pretend that we  
Are free, let's all be where the angels  
Find us, we all have the key  
Shall we seal the truth of life  
Shall we light the heavens  
We're so good at finding pleasure  
As to what we are, and how we fit  
Together  
Let us sing the song it is  
Let the sound of all belief  
Let's all find that space in life  
To follow in between  
It's something that I feel  
To pour upon my soul  
Countenance of love  
For one n' all  
To know there's so many ways

The force of nature prevails  
I lay down, I lay down and I pray  
Let's get our hearts together  
And as before, and like before  
We'll do again  
To know there's so many ways  
The force of nature prevails  
I lay down, I lay down and I pray  
Let's get our hearts together  
As before, and like before  
We'll do again  
Let's get our hearts together  
As before, and like before  
We'll do again  
Let's get our hearts together  
As before, and like before  
We'll do again  
Do again...
