Open scar you left a mark
And you're no one, no one 'til you die
The bridge is crossed, you've won but lost
And you're no one, no one 'til you die

But when your hope's gone to bed
You wake up having blood on your face
And when your love's gone to waste
You know we're going down

Open door, I'm scared but bored
And you're no one, no one 'til you try
So you fool the ache, pretend and fake
That you're someone, someone 'til you die

But when your hope's gone to bed
You wake up having blood on your face
And when your love's gone to waste
You know we're going down
And we're no one, no one, no one 'til we die
When your hope's gone to bed
Then baby we are all gone
Oh we'll be gone

Open heart, we're brave at start
But we're no one, no one 'til we die

When your hope's gone to bed
You wake up having blood on your face
And when your love's gone to waste
You know we're going down
And we're no one, no one, no one 'til we try
So when your hope's gone to bed
You're tryin' hard to leave but you can't
And when you're hidin' below
Then baby we are all gone
And we're no one, no one, no one 'til we try
So when your hope's gone to bed
Then baby we are gone, gone
