How do you know  
What I look for, so long  
And all that time when I tried to find  
Was wrong

You're always there  
Every single time  
Even when I'm not with You

But when I come around  
It won't take very long  
To find my way to Your embrace

You see in me  
What I could be, I try  
Should it be so hard  
For me to love? Completely

You're always there  
Every single time  
Even when I'm not with You

But when I come around  
It won't take very long  
To find my way to Your embrace

I never took the time  
To see You in my life  
Would there be less pain and loss?

Hoping that my eyes can help me see  
I think that You would let in front of me

You're always there  
Every single time  
Even when I'm not with You

But when I come around  
It won't take very long  
To find my way to Your embrace
