

The Rumour Said Fire

"Air Force"

Visit "[Air Force](#)" on MotoLyrics.com

Everyone's leaving
The house is in mess
You and your magic friend
Chose to confront me folding the air into a dark affair
We need an air force
To gather the pieces, the love and the fear
I made your skin crawl on this night
Oh, my love
Lock up the doors
There's no easing the pain
Losing a life of games
Brought to impostures and comfort in death
You walk alone, my friend
We need an air force
To gather the pieces, the love and the fear
I made your skin crawl on this night
Oh, my love
Take off these sad clothes I need you to feel my
despair Breaking the atmosphere
All of your talk of the dead will not stop
Breathe me like toxic love
We need an air force
To empty the streets with their naked machines
You made my skin crawl on this night
Oh, my love
We won't be air borne
Caught with the dust and the salt on the floor
We need an air force in this life
Oh, my love
