

Sloan "In The Movies"

Visit "[In The Movies](#)" on MotoLyrics.com

In the time it takes us to walk another city mile
we could do it in the movies
do it in the movis like what you're on about

a reason why you're out of style
by the time I show you
you could see it in the movies

clearly I don't even know what I'm doing
Or what I'm on about
it feels like somebody else's lights came on
I'll take another look around

day in or day out
and the feeling I get when I watch you
can make me feel I can turn it off or on
every day you wonder

if I can read between the lines
I could do it in a movie
do it in a movie - that's what it's all about
and I don't even know where I'm going
it feels like somebody else's lights came on

I'll take another look around
or where I'm coming from
and now I'm travling down the autobahn
and I'm too afraid to turn around
but I'll take another look around
just like they did it in the movies
and I can't even see where I'm going

we could do it in a movielike they did in the movies
