Some how I always knew
That you, would finally decide what you want
The changes I have made, have helped me see
But why am I asking now?

You say
I could never run away

(Chorus)
Now you gotta let me know
Was it love that kept you here?
Now you gotta let me know
You brought out the worst in me, signed yours truly

As I fall on me knees
I see, my reflection staring back at me
Is this what I've become, a ghost of the man I was?
And everything I know feels so far away

You say
We will never be the same

(Chorus)
Now you gotta let me know
Was it love that kept you here?
Now you gotta let me know
You brought out the worst in me, signed yours truly

(Bridge)
Take, take, your taken me with you
Take, take, take me with you
Take, take, your taken me with you
Take, take, take

Now you gotta let me know
Was it love that kept you here?
Now you gotta let me know
You brought out the worst in me, signed yours truly
