Please don't let the light though my window
Keep the curtain shut
It brings me good luck

Please don't let the light through my window
Don't wanna see the day
I don't need it anyway

Please don't let the light through my window
Don't wanna see the shop
Or the wet bus stop

Please don't let the light through my window
The bells ring out for doom
On this sunday afternoon

Please don't let the light through my window
Please don't let the light through my window
Please don't let the light through my window
Please don't let the light through my window
Please don't let the light through my window
Please don't let the light through my window
Please don't let the light through my window
Please don't let the light through my window
Please don't let the light through my window...
