You're not the girl that I once knew  
Now you're so much more  
The sun and the moon came up for you  
As I lay on the floor  
Don't need no bed, don't need no rest  
All I want is you  
Don't need my right, don't need my left  
All I want is you

To hold me tight all through my life  
I'll make you feel alright every night

I wish I knew who took my place  
Was I ever there  
The wind hit hard and scorned my face  
Love's for those who dare

Don't need no songs, don't need no books  
All I want is you  
I don't need no second look  
All I want is you

To hold me tight all through my life  
I'll make you feel alright every night

In the grass that's where I lie  
Sleep beneath the sun  
With daffodils and dragonflies  
She's the only one

Don't need no recks, don't need no will  
All I want is you  
I don't even need myself  
All I want is you

To hold me tight all through my life  
I'll make you feel alright every night  
Night, night, night!
