

Coral, The "The Operator"

Visit "[The Operator](#)" on MotoLyrics.com

The operators came and took me away
Took me away
Everybody laughed
Remember the day they took me away

I don't know what they're looking for
Don't think I'll ever know

They laid me on the bed, drilled my head
The incision bled
Put wires in my brain, every now and again
I remember a name

And as I drift away
Into my hiding place

A maze of alleyways
Where the cameras cannot see

The operators came and took me away
Took me away
Everybody laughed
Remember the day they took me away
Remember the day they took me away
Remember the day they took me away
