Here I am

I'm walking on the streets all alone
And leave all the bad things behind
There's something in my mind you should know
Why don't you get hell out of my life?

I'm all right, don't worry for me
Don't cry, I'm gonna leave out that door
And come back no more
I'm all right, I'm gonna start a new life
This thing go on and on
Just leave me alone

Everything was spinning around you
But it's almost over now
Every day was sad because of you
But it's almost over now

Our love is lost in time
We need to stop this fight
And move it on, and move it on
Our feelings turn to dust
They weren't there to last
We're moving on

Everything was spinning around you
Every day was sad because of you

Everything was spinning around you
But it's almost over now
Seni unutmaya baÅŸıyordum
