Oha ah ohh oha ah oh. (x4)

Look up look out, here it comes with the speed of light
Burning through your eyes, it's gonna take you by
surprise.

Oha ah ohh oha ah oh. (x2)

Watch out watch your back, it's not that far like a falling
star.
Don't run don't hide, he will catch you anyhow.
It leaves no trace, it leaves no marks.

You have to find a clue, then find your way through
Don't let the illusion confuse you
Everything is not like it used to be,
The shortcuts wont help you, make sure you prepare.
But in the end it all depends on you.

Wake up, it's for real, wake up, it ain't no dream.
You've got to keep it up, you've got to leave it all out.

Oha ah ohh oha ah oh. (x2)

There is no half heart way, there is no giving up.
You falling down, You falling right through.
You've got to get up.
You've got to get back.

You have to find a clue, then find your way through
Don't let the illusion confuse you
Everything is not like it used to be,
The shortcuts wont help you, make sure you prepare.
But in the end it all depends on you.
(X3)
