

Smalltown Poets "There's A Day"

Visit "[There's A Day](#)" on MotoLyrics.com

The sun set down behind the trees
How quickly did my skin
Sense the chill upon the breeze

And I'm uneasy, the night surrounds me
As dusk ushers out the light of day
A symbol to be sure that my life can't forever stay

There's a day when there will be no night
There's a day when there will be no night
Don't you know the lamb will be our light

Vassal, star and noble moon
(There's a day)
Your king comes riding soon
[Incomprehensible]

And as I mourn this loss of mine
I'll leave it up for you to shine

There's a day when there will be no night
There's a day when there will be no night
Don't you know the lamb will be our light

Darkness makes the baby cry
So the father sings a lullaby to drive the tears away

There's a day when there will be no night
There's a day when there will be no night
Don't you know the lamb will be our light
There's a day when there will be no night
(There's a day when there will be no night)
