Break everything you love  
After all there's no hope or god above  
Looking at the bright side  
At the bright side

Kill everything inside  
It's better to be dead, there's no where left to hide  
Looking at the bright side  
At the bright side

Give me just one more chance to think about it  
There's more to life then (then sex?)  
And there's more to me then man  
And I need to pick myself up off the ground  
Before I (take it too well?)

Why do I feel like this  
Whenever I get up I'm right back in the shit  
Looking at the bright side  
At the bright side

As long as I get my fix  
I watched the pain dissolve there's nothing left but bliss  
Looking at the bright side  
At the bright side

Give me just one more chance to think about it  
There's more to life then (then sex?)  
And there's more to me then man  
And I need to pick myself up off the ground  
Before I (take it too well?)

I need to rebuild my mind so I'm strong again  
I need to rebuild my life so I'm full within

Cause there's more to life (then sex?)  
And there's more to me then man  
And I need to pick myself up off the ground  
Before I (take it too well?)
